Resolution vs. replicability tradeoff for 'off–the–shelf' methods.

Legend:
Replicability between 10X v3 and Smart–Seq
+ for single-cell datasets
■ for single-nuclei datasets
Replicability betwen Cell and Nuclei
● for 10X v3 datasets
▲ for Smart–Seq datasets

Y-axis: Fraction of replicable clusters (0%, 20%, 40%, 60%)
X-axis: Number of clusters (Resolution) (25, 50, 75, 100)
